

1. Why have I got additional links in blue on the left hand side of my parent page?

Additional information should be linked to subpages in your report and not the parent publication.

If you select to link additional pages to the parent publication it will be shown as an additional link under recommendations, key findings, conclusions and recommendations on the left hand side of all your subpages.

Note, if you permalinks are not working it may be necessary to link the pages to the parent publication, as this address will be shorter.
